SUMMARY

Information Systems graduate from **Universitas Komputer Indonesia (UNIKOM)** focused on **systems analysis** and **web application development**. I have hands-on experience **analyzing manual work processes**, **gathering user requirements**, and turning them into **working web-based systems** using **PHP, Laravel, and MySQL**. My projects include a **stock management system** for a small business that is now running online, an **operational system for a photo booth business**, and a **web-based internship registration prototype** for a government office. I am actively seeking opportunities as a **System Analyst** or **Web Developer** to help organizations build systems that are **effective, reliable, and easy to use**.

EDUCATION

Universitas Komputer Indonesia (UNIKOM) Bandung, Indonesia
Bachelor's Degree in Information Systems, GPA 3.53/4.00 (Cum Laude) Graduated Aug 2026
Relevant Coursework: Information Systems Analysis and Design, Business Process Analysis, Database Design, Web Programming Practice, Object-Oriented Programming, Software Engineering, Software Testing and Implementation

WORK EXPERIENCE

General Affairs Bureau, Regional Secretariat of West Java Province Bandung, Indonesia
Intern, Administration and Personnel Division Aug 2025 - Sep 2025

- Analyzed the manual internship registration process, then built a **12-page** front-end prototype of a web-based registration system using **HTML** and **Tailwind CSS**, covering account sign-up, internship application, and status check
- Built a statistics dashboard that reads **102 intern records** from a CSV file using **PHP** and shows a summary by status (active, completed, rejected) and by **11 universities**, making it easier for the division to monitor interns
- Worked with division staff to gather requirements and adjust the design to the current administrative workflow

PROJECTS

Setara Booth: Photo Booth Business Management System (Team Business, Ongoing) Sep 2026 - Present

- Building the full operational system for a four-person photo booth business with **Laravel**, consisting of a booth mode for customers and an admin dashboard for the team
- Developing the touch-screen booth flow, from choosing a frame or package and paying with **QRIS** to a photo session with countdown and printing or downloading the photos
- Building an admin dashboard for recording transactions, monitoring remaining print paper with low-paper alerts, managing vouchers, and creating monthly reports and data exports

Kevatie Stock Management System (Undergraduate Thesis, PHP and MySQL) Feb 2026 - Aug 2026

- Analyzed the manual raincoat stock recording process for **6 product models** and **45 SKUs**, then built a web-based stock system using **PHP** and **MySQL** to record incoming and outgoing goods and monitor stock in real time
- Mapped the workflow and needs of **two user roles**, Owner and Warehouse Staff, into process diagrams (use case, activity) and a database design (**ERD**) as the basis for improving the process
- Tested the system using **Black Box Testing**, created stock reports that can be printed to PDF, and put the system online through a hosting service

CERTIFICATIONS

English Proficiency Test, Language Center, Universitas Komputer Indonesia (Score 503) May 2026

- Covered Listening Comprehension, Structure and Written Expression, and Reading Comprehension, with the highest result in Reading Comprehension, valid until May 2028

Certified Associate Data Scientist (CADS), Indonesian Professional Certification Authority (BNSP) Sep 2025

- Competent in **9 competency units** of Artificial Intelligence, covering data collection, exploration, validation, and cleaning through model building and evaluation

Belajar Dasar Pemrograman Web (Web Programming Basics), Dicoding Indonesia May 2024

- Learned the basics of **HTML** and **CSS**, from semantic elements, box model, and positioning to responsive layouts with Flexbox and media queries, and passed the final exam and website project submission

ORGANIZATION AND VOLUNTEER EXPERIENCE

Karang Taruna Bandung, Indonesia
Treasurer, Rajaban Akbar Committee Dec 2025 - Jan 2026

- Managed and recorded **90+ transactions** of event income and expenses with total funds of more than **Rp10 million**, complete with receipts, and presented clear financial reports in weekly committee meetings

Paramuda Indonesia Bandung, Indonesia
Volunteer, Mega Project, Pajajaran Education Group Jun 2025

- Selected as a volunteer for a community program in Cijambe Village, Ujungberung, running education and cultural activities with local residents, such as traditional Sundanese games for children, Qur'an distribution, and small business discussions with local women

TECHNICAL SKILLS

Programming and Query: PHP, JavaScript (basic), Python, Java (basic), SQL, HTML, CSS, Kotlin (basic)
Frameworks and Database: Laravel, Bootstrap, Tailwind CSS, MySQL
Data Analytics: Google Colab, Jupyter Notebook, Microsoft Excel, Google Sheets
System Modeling and Design: UML, ERD, Draw.io, Figma (basic), Canva
Development Tools: Visual Studio Code, XAMPP, phpMyAdmin, Android Studio, GitHub (basic), cPanel
Methods: Requirements Analysis, Database Normalization, MVC, OOP, Black Box Testing
Office and Collaboration: Google Workspace, Microsoft Word, Microsoft PowerPoint
Languages: Indonesian (Native), English (Good Reading, Basic Speaking, English Proficiency Test 503)
